

Contribute to the Driver

For Bugs and Feature Requests

If you think you have found a bug or want to see a new feature in the Ruby driver, please open an issue in JIRA [↗](#):

1. Create a Jira account and login [↗](#).
2. Navigate to the Ruby project [↗](#).
3. Click **Create Issue**. Provide as much information as possible about the issue, including:
 - Steps to reproduce it.
 - Version information for the driver and MongoDB.
 - Any applicable code snippets, stack traces and log data. Do not include any sensitive data or server logs.

NOTE:

Bug reports in JIRA for the driver and the Core Server (i.e. **SERVER**) projects are public.

If you identify a security vulnerability in a driver or any other MongoDB project, please report it according to the instructions found in the Create a Vulnerability Report [↗](#).

Contribute to the MongoDB Ruby Driver

The MongoDB Ruby driver source is located at <https://github.com/mongodb/mongo-ruby-driver> [↗](#).

For instructions in contributing to the driver, see <https://github.com/mongodb/mongo-ruby-driver/blob/master/CONTRIBUTING.md> [↗](#).
