Ruby parser failure	Code Smell
Functions should not have too many lines of code	Code Smell
Statements should be on separate lines	

Track uses of "TODO" tags

Analyze your code

Code Smell

Info ?

cwe

TODO tags are commonly used to mark places where some more code is required, but which the developer wants to implement later.

Sometimes the developer will not have the time or will simply forget to get back to that tag.

This rule is meant to track those tags and to ensure that they do not go unnoticed.

Noncompliant Code Example

```
def do_something()  
  # TODO  
end
```
